At the Holy Cross hospital this | orning there died a patient by the me of John Ward, and the cause of his death is now supposed to have what the doctors call ecchinococ-

man presented himself to Dr. Mayo, ounty physician, and applied for relef. He explained that he had been herding sheep in Beaver county, and that his disease had grown upon him until he was then unable to do further work without being relieved. Upon Dr. Mayo informing the man that he must procure a certificate from Beaver ounty before attention could be paid his case the patient secured the necessary paper and he was taken to the Holy Cross hospital.

opinion was concurred in by all other physicians who examined the patient. This disease, explained Dr. Mayo, is peculiar to Iceland and is superinduced by the close association of human beings and dogs. It appears in the form of a series of hooks similar to miniature cat's claws and first gains ingress by means of the alimentary canal, thence through the bowels into the stomach, where it eats its way through the walls of that organ until it reaches the region of the liver, where it attaches itself and grows. It is then in the form of a cyst containg a mass of cysts and sometimes attains such large proportion as to contain from 10 to 20 proportion as to contain from 19 to 20 gallons of fereign liquid.

At 5 o'clock this evening at O'Don-nell's undertaking establishment an autopsy was begun in the presence of a number of prominent physicians the Holy Cross hospital.

His case was a puzzle and no help was thought by Dr. Mayo that Ward's was thought by Dr. Mayo that Ward's lisease was ecchinococcus, and his discovered in Utah.

Dr. J. M. Tanner has just returned from Sanpete county, where he has been delivering lectures and inspecting the Church schools in that locality One of the most important matters that Dr. Tanner has on hand at this time is arranging for the coming con-vention of the Church school teachers. The convention will be held in this city just prior to or immediately after the state teachers convention in order that the Church teachers may have the benefit of attending the latter. Full arrangements for the convention have not been made, but Dr. Tanner is busy preparing topics for consideration. The most vital one perhaps will be the ad-visability of adopting in the Church schools the same secular text books as ose that are in use in the state schools order that the training in the one will be uniform with that in the other Dr. Tanner is strongly in favor of the move, and it is not at all improbable that uniform text books will be adopt-

Dr. Tanner says that the care that should be taken in adopting text books for the public and private schools can-not be emphasized too strongly. Some books, he said, have found their way into the schools that are of so inferior a character that the teachers have taken it upon themselves to introduce supplementary books into schools, thus entailing an additional expense upon the patrons.

Adolph F. Kraus, Sculptor, Dead Hyde Park, Mass., Nov. 8 -Adolph F. Kraus, the famous sculpter, died in Danvers insane hospital last night. Mr. Kraus had been receiving treatment at the institution since last July. He was 51 years of age. A widow, four sons and two daughters survive him.

A pensioner of the Prussian government and winner of the grand prize of Rome, the name of the sculptor was established in Europe before he came to America in 1881. In this country he continued to win fame and it was the disappointment of his ambition to produce a masterpiece which is said to have caused his mind to give way. He had partially completed a model in clay of a heroic figure of Belzhazzar at the moment of seeing the hand-writing on the wall when his mind became unbal-anced. Among his noted pieces in America are the Theodore Parker and the Crispus Attuck's monument. In the competition for the Iowa state soldiers' monument Kraus won second prize. He was the sculptor of the winged figure of Victory that crowned the tower of machinery hall at the world's fair at Thicago, and which received great ad-

Flour Takes Another Jump of Ten Cents a Hundred.

COMBINATION OF MILLERS.

Fool of Utah and Southern Idaho Millers to be Effected in the Near Future.

The wholesale price of flour was again advanced this morning another 10 cents per hundred pounds on each of the three grades. The ruling prices now are, for High Patent ,\$1.90; for Straight, \$1.70, and for Baker's, \$1.60 per hundred pounds. The local millers give as a reason for the advance, which is the third of 10 cents each to be made in the last few weeks, that the price of wheat has so greatly advanced recently that flour could not be manufactured without loss at the previous prices. When one prominent miller was seen this morning he said: "The price of flour simply had to be advanced and yet now we are making very little money. Wheat has gone up in bounds during the past six weeks and we can't get it in the quantities we want and need. Early in the season great quantitles were shipped to Colorado and other states and there is a scarcity now. don't think it will last very long, but not be surprised to see flour sell at still higher prices. The dry season just past, shortened the crop of wheat as it did the hay and other crops and that, in connection with the fact that much was exported from the state, has caused the scarcity, and the raise in

It is stated that the combination of the Utah and Southern Idaho mills will be effected during this month or in December. A. The syndicate will invest \$1,000,000 or more in the en-terprise. Just what its action will be if the control passes while present condi-tions prevail, is very much in doubt. but it is more than likely that some mills would be closed down and that, since some of the people interested are Colorado flour men, wheat would be shipped in from that state or elsewhere.

Andrew Leonard, guard, leg broken.

It develops that the mutiny was hatched several months ago, but that the men had never found a favorable opportunity to carry it into effect until yesterday. The general plan was not new, but it proved effective because of the limited number of guards. As the better behaved prisoners are used in the outside work, the conspiracy was hatched among the real in the their section. hatched among the men in the inside gangs.

The convicts chose the most favor-able moment of the day, while many of the guards acting as foremen of construction of the new cell-house were unarmed.

guards were formed in marching order and mounted men, armed to the teeth, were drawn up in front of the main entrance of the prison. Most of the guards were old plainsmen and the di-version of hunting down criminals stirred their blood as nothing else could have done. The escaping convicts were counted the most desperate criminals in the southwest and the guards star, ed out on their hunt in full realization

The scene of mutiny, however, being some distance from the prison proper the convicts had secured a good start and, aided by the rough, wooded country they had, before darkness fell, placed a good gap between themselves and their pursuers. The guards at best could make but a desultory attempt at pursuit and were compelled to await daylight to take up

The officials at Kansas City, Atchison, St. Joseph. Topeka and Leavenworth were asked to keep their police on the lookout and all night in each of the cities named police and detectives pa-

trolled the outskirts. During the night reports came from eleven directions of thefts of horses and vehicles, clothing and food by the convicts and as the report that the convicts were at large spread, citizens in the outlying districts became terror-

stricken and barred their houses. Early this morning an increased number of guards, well armed and mounted, were started out from the penitentiary and today was spent in as exciting a man hunt, perhaps, as has been experienced in this part of the country since the border days.

It is believed that all the convicts

will ultimately be captured, if not over-taken by the guards and shot. Each prisoner has undergone an examination

Leavenworth, Kan., Nov. 8.—Forty mounted guards are beating the country for a radius of five miles around the federal penitentiary today in search of the twenty-six convicts who succeeded in escaping from the guards and rough and affords ample opportunity for escape and as all of the convicts are desperate men and armed conflicts will doubtless result before they are captured.

The net known result of the mutiny and the following fight with the guards was one convict killed and four guards.

In the bertillon system and today these descriptions were mailed to every chief of police in the country.

Warden R. W. McClaughry was in Kansas City when the mutiny broke out, arranging for the annual convention of the National Prison Reform association which is to convene there to make the prison about three hours later and immediately set to work to re-capture the convicts. "I have not completed my investigation," said he today, "but I am of the opinion that the outbreak was not the opinion that the outbreak was not the other of the National Prison Reform association which is to convene there to morrow. He arrived home at the prison about three hours later and immediately set to work to re-capture the convicts. "I have not completed my investigation," said he today, "but I am of the opinion that the outbreak was not the opinion that the outbreak was not the following fight with the guards. The men were in charge of Arthur Trelford, one of our best men, and I am sure he did his duty. The and I am sure he did his duty. The reason for the escape of the prisoners I believe to be the small number of

guards available. Our appropriation is not sufficient to warrant the employment of more guards, but I hope that at the next session of Congress we will be allowed more. We should have nearly twice as many as we have." MAKING FOR INDIAN TERRITORY. Kansas City, Mo., Nov. 8.—A special to the Star from Leavenworth, Kansas,

Advices received at the prison early today indicate that the convicts are making for the Indian territory, a hundred miles south, at break-neck speed, Warden McClaughry is making every effort to head them off before they reach the Kansas river. He started telegraphing last night to get should's reach the Kansas river. He started telegraphing last night to get sheriffs and other officers to guard the bridges. Telegrams received today from the neighborhood of Linwood, Kansas, and several other points says farmers well armed are watching the bridges.

The report shows that the convicts are selzing farmers' horses and run-ming them at a high speel until the animals give out and then pressing in fresh ones whenever found. By making these relays they are trying to out-ride the officers to the territory.

None but guards and civil officers out for the \$60 reward are now in the chase. Soldiers are keeping watch over the reservation. No prisoners were sent out to the new penitentiary site today and all work is suspended and the convicts held in cells so that the guards can take up the hunt. Warden Mc-Claughry, with a force of trustles, is hard at work running off pictures of the convicts at large. Two hundred the convicts at large. Two hundred sets will be mailed by tonight to differ-

ent chiefs of police.
Guard Waldrupe, who was shot in ie head is still alive, but the surgeons have no hope of his recovery. Leonard whose leg was broken, will be a cripple for life. The other guards are doing well.

Whether or not any of the citizens were wounded is not known in Leavenworth.

SCHLEY COURT OF INQUIRY. Transferring Its Effecis from Gunners' Workshop to Up Town.

Washington, Nov. 8 .- The Schley court of inquiry is today transferring its effects from the gunners' workshop in the navy yard to the up-town quarters in the McLean building, Vermont avenue and H street, which will be the consulting quarters. No effort will be made by the members of the court even to confer upon the case, however, be-fore next Monday, as they are in need of mental and physical rest. The court will ask the navy department to supply it with elerical assistance and a stenographer to do the mechanical work involved in a preparation of the report. In order that the court may absolutely control such assistants, it is probable that recourse will be had to men in the naval service such as yeoman who are subject to naval discipline.
Capt. Lemly, the judge advocate of

the court, has gone to Kansas City, Mo to attend the meeting of the National Prison Reform association, in which he is interested by reason of the fact that he is specially charged with the conduct of the naval prisons at Boston, Norfolk and elsewhere.
